

Part-time Intern

QUASAR Federal Systems has an opening for a part-time intern. The job involves working with a team of scientists and engineers to develop electric and magnetic field sensor systems. Daily duties will include general lab work, setup of experimental apparatus, support and/or execution of experiments, data collection, processing of data and reporting.

The right candidate will have completed at least their sophomore year in Physics, Electrical Engineering or a related scientific field, and must have at least 2 years of laboratory course work in that field. The applicant should be familiar with the usage of computers to automate data collection and analysis. Good writing skills and excellent laboratory practice are required.

Some experience outside the classroom is preferred. Experience with C/C++, LabVIEW, or related programs is desired. We would like the candidate to start now. This position may have expansion opportunities.

The candidate must be a US Person. Please send resumes to hr@quasarfs.com.
