

## **Entry Level Mechanical Engineer/Lab Tech**

QUASAR Federal Systems is looking for a full time, entry level Mechanical Engineer/Lab Technician with an interest in research. The job involves working with a team of scientists and engineers to develop electric and magnetic field sensor systems, and this position would be suited to a recent ME graduate with assembly skills who enjoys lab and possibly field work.

The responsibilities of this position will include:

- Mechanical CAD engineering work
- System assembly and disassembly
- Running of tests, performance verification, and experiments as needed
- Possibly some field work
- Other responsibilities as required

The right candidate will have a Bachelor's degree in Mechanical Engineering or a related field. Lab/internship experience is desired. Assembly experience is very advantageous.

LabVIEW, SOLIDWORKS, and Altium skills are desired.

The candidate must be a US Person. Please send resumes to [jobs@quasarfs.com](mailto:jobs@quasarfs.com).
